## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 40-54 are, drawn to a targeted lipid particle comprising an assembly of one or more lipids and a method of delivery.

Group II, claim(s) 55-81 are, drawn to a targeted polar lipid.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group one is directed to particles which are made of a combination of polar lipids which are not necessarily of the polar lipid of Group II. Furthermore, Group I particles could contain in addition an active agent and the method is directed to a delivery of an active agent in vivo or in vitro.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

In Group I: a) particles containing additional lipids as recited in claim 51; b) particles containing additionally a biologically active agent as recited in claim 52.

Art Unit: 1615

In Group II: a) lipid of the formula in claim 55; b) lipid of the formula in claim 56.

If applicant elects Group II a), applicant should also elect one specific group in L4, L1 and R 1.

If applicant elects Group II b), applicant should also elect one specific group in L4, R7, L3, R6, L1, R2, R3 and R4.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: 40-50 and 53 are generic to Group I species and none is generic to Group II species.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Art Unit: 1615

Group I a particles which do not have a biologically active agent could be used for in vitro assays of antigens or antibodies depending upon the targeting moiety. This feature is technically different from the particles which have a biologically active agent which are used for the delivery of the active agent in the treatment of a disease. Group II species: although applicant recites the compound in claim 56 as a dependent claim, technically it is a different compound. For example, claim 55 compound requires only one cation OC whereas the compound in claim 56 could have several cationic centers.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
